FAIZANULLAH ATAL

IT Support | Cybersecurity

Sydney NSW | atal.faizan2003@gmail.com | linkedin.com/in/faizanullah-atal | github.com/faizanatal019-bit

PROFILE

IT support and cybersecurity student with a public portfolio of hands-on security labs. Studying ICT (Cybersecurity pathway) at Western Sydney University and completing the Google Cybersecurity Professional Certificate, with working knowledge of Windows and Linux, SIEM tooling, network security and incident response fundamentals. Front-of-house experience at a diagnostic medical laboratory built the habits service desk work rewards: accuracy under pressure, calm handling of stressed people and disciplined record keeping. Seeking a Level 1 Service Desk or IT Support role as the first step toward a security operations career.

TECHNICAL SKILLS

Security: SIEM (Splunk), threat detection, incident response fundamentals, firewalls, VPNs, intrusion detection, SOC concepts

Systems and networking: Windows, Linux (command line, file permissions, user management), TCP/IP fundamentals, network troubleshooting

IT support: Ticket handling and escalation, hardware and software troubleshooting, user support in person and remotely, technical documentation

Programming and web: JavaScript, HTML, CSS, Node.js, C, C++, Java

Databases: MySQL, MongoDB

EXPERIENCE

IT Assistant May 2026 to present

Non-profit education organisation, Sydney

- Fix and update the organisation's website using HTML and CSS, and keep website content up to date.
- Checked the website for broken and outdated links and reported them with clear notes.
- Entered data, kept records accurate and gave general IT and admin support.

Receptionist 2020 to 2021

Saba Medical Lab, Kabul, Afghanistan

- First point of contact for patients at a busy diagnostic laboratory, managing appointment bookings, inbound calls and walk-in enquiries.
- Entered and maintained patient and test records to a high standard of accuracy, because errors in medical data affect care.
- Organised filing systems so results and patient histories could be found quickly.
- Supported unwell and distressed patients with patience and discretion while managing several tasks at once.

PROJECTS

Cybersecurity Portfolio | Independent Ongoing

github.com/faizanatal019-bit/cybersecurity-portfolio

- Maintain a public repository of hands-on security labs and notes covering network security, Linux fundamentals, threat detection and incident response.
- Document each lab with the objective, the steps taken and what the results showed, so others can review and repeat it.

Hobby Explorer Website | Independent

- Designed and built a responsive website end to end with HTML, CSS, JavaScript and Node.js, from layout to cross-device testing.

DocSutra, Document Management Web Application | Team project

- Co-designed the front-end interface and carried out functional testing before release.

EazyVC, Blockchain Voting Application | Team project

- Contributed to front-end design and functional testing for a blockchain-based voting application.

EDUCATION

Diploma in Information and Communication Technology 2026 to present

Western Sydney University | Pathway to Bachelor of ICT (Cybersecurity)

High School Diploma December 2019

Abdul Ghafoor Nadim High School, Afghanistan

- Graduated top of the class with an overall result of 98.29%.
- Elected Vice President of the Student Council, running school events and representing students to staff.
